

PEGASO

*altezza piano rete (+ altezza materasso variabile)

Structure: Supporting structure made of high-resistant tube, epoxy powders.

Beech-wooden slat, orthopaedic bed base. Thanks to the pistons, the bed base can be lifted up giving space to a wide wooden base container; the second type of movement (**zero space**) let the bed base be lifted up to a useful height so that the arrangement is easier.

The net, in this case, will remain at the same size of the bed frame, without coming outside (in front) as other mechanisms, this is why it is called "zero space". Standard feet in PVC.

Padding: Inderformable polyrethane foam without CFC, 100% polyester fibre and light velvet covered. Completely removable cover.

Mattress non included

Optional: Wooden feet increase € 45. Metal feet increase € 80.

Mixed wooden and metal feet increase € 55
